

My name is Susan Quesenberry and I am the General Manager of a cluster of free over the air radio stations in the Clarksville, Tennessee and Hopkinsville, Kentucky area. I support the NAB's petition seeking a declaratory ruling of satellite radio broadcasting local weather and traffic.

As a local broadcaster, our group has been and remains committed to our local community. We are heavily involved in fundraising for our community. We fill a huge roll in keeping our community informed with public service announcements and news that affects our local area. We are home to the 101st Airborne and we have played an important role of keeping our community informed. We have been involved in many fund raising efforts for our troops and the families that were left behind. We helped put on a free concert to welcome the 101st Airborne home. These are things that satellite radio cannot replace.

Many of our staff members sit on the boards of various charities for our marketplace to ensure that we are in touch with the needs for our local community. My understanding of the FCC grant was that satellite radio was supposed to be national only. Satellite radio can not come close to the level of effort, service, compassion and heart that a local broadcaster will provide to their local community.

Respectfully,

Susan Quesenberry  
General Manager
